

STERILYFT

CEC Elevator Cab & Door Corp proudly introduces STERILYFT.
A complete elevator cab air purifying and sterilizing system for any elevator.

With today's current pandemic and new health concerns in the world on how to stay healthy, how to stay safe, how to battle COVID-19, we are continually discovering new areas of concern that we've never considered prior. Our new "NORMAL" requires some NEW NORMALS.

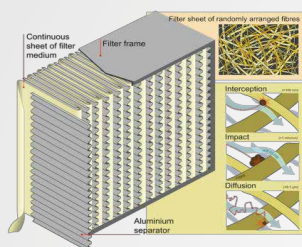

Current CDC COVID-19 Employer Information for Office Buildings guideline recommends "increase total airflow supply to occupied spaces...increase air filtration to as high as possible (MERV 13 or 14).....consider using ultraviolet germicidal irradiation..." in their "Take steps to improve ventilation in the building" section.

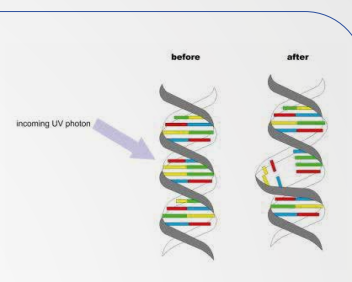

<https://www.cdc.gov/coronavirus/2019-ncov/community/office-buildings.html>

With long term tested and proven solutions to disinfection already being used throughout the world, why can't these methods apply to elevators?

HOW TO USE YOUR ELEVATOR WHILE STAYING HEALTHY

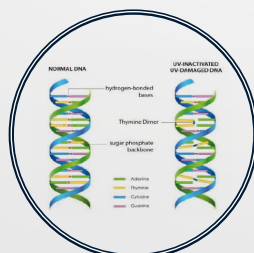

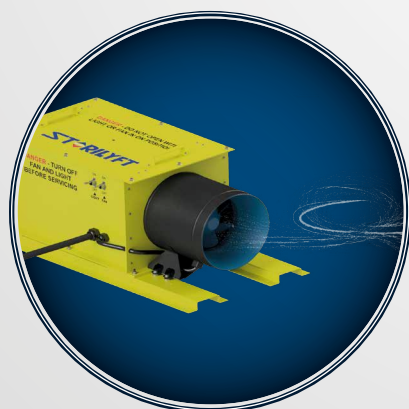

PROBLEM:

Elevators have very little or no circulation of air. Furthermore, no air sanitization is accounted for at all. With the combination of lack of social distancing ability, the elevator becomes a VERY dangerous risk factor for airborne pathogens.

SOLUTION:

Provide proper, continual, balanced circulation removing contaminated air and replacing with filtered sanitized air utilizing **HIGH EFFICIENCY** filtering and **UV-C IRRADIATION**.

EFFICIENT, POWERFUL AND BALANCED
EASY INSTALL
With Multiple Install Options
